About

Full-Stack Developer with experience building web and mobile applications using JavaScript, TypeScript, React, Next.js, React Native, Go, and PostgreSQL. Skilled in developing APIs, designing database structures, and delivering end-to-end features from frontend interfaces to backend systems. Focused on writing maintainable code, solving practical problems, and continuously improving technical skills while building reliable, user-focused applications.

Education

Medical Technology Engineering

Baghdad, Iraq

Experience

Full-Stack Engineer | 2025 - 2026

Newyolk | Baghdad, Iraq

- Developed web and mobile applications using React, React Native, and Go.
- Built backend services and APIs with Go and PostgreSQL.
- Implemented educational features including lecture video management, student attendance tracking, and subscription management.
- Developed a multi-institute architecture supporting independent educational institutions.

Frontend Developer | 2024 - 2025

Al-Habbar | Frontend Developer

- Developed frontend features for a recruitment platform connecting employers with job seekers.
- Implemented interfaces for job postings, applications, and real-time messaging.
- Worked on features supporting voice calls and video meetings between employers and job seekers using React and React Native.

Full-Stack Engineer | 2022 - 2024

INBOX | Remote

- Designed and developed the complete ERP system, covering frontend interfaces, backend logic, database integration, and business workflows.
- Built the entire mobile application using React Native.
- Contributed to the development and maintenance of the CRM system.
- Implemented features including employee management, attendance tracking, contracts, deposits, notifications, and PDF generation.
- Used React, TypeScript, tRPC, Prisma, and PostgreSQL to build and integrate application features.
